

## Training on Developing Fuel Economy Standards and Policies

Regency Room, Taj Samudra Colombo | 18 November 2014, 8:30-1:00pm

**Background and objective:** There are only a few countries in Asia that have adopted progressive fuel economy standards and policies. The Global Fuel Economy Initiative (GFEI) works with national governments and other stakeholders to develop fuel economy policies worldwide in order to achieve a doubling of energy efficiency of the global vehicle fleet by 2050, and reduce GHG emissions and contribute to the global target of keeping temperature increase to within 2 degree Celsius. This training aims to reach out and inform other Asian countries on the technical and practical issues on developing fuel economy standards and policies.
